

Trilogy Machinery Advantages

DEDICATION

Trilogy is a team of over 13 dedicated and energetic professionals ready to assist with your Metal Fabricating Machinery needs.

SOLUTIONS

We offer solutions to your Metal Fabricating Machinery needs. Our sales technicians are all factory-trained to assist with providing the correct machine for your job.

UNLIMITED SUPPORT

We service what we sell! Trilogy has a massive stock of spare parts and we also offer world renowned technical support by our factory-trained technicians. Customers get free phone support for the life of the machine.

NATIONWIDE DEALERS

In addition to the service and support provided direct from Trilogy, we also have an extensive network of local dealers that are ready to help with on-site service, sales and support.

Tube Punching Machines

Tube, Pipe, Extrusions

Custom Punching Solutions

BSP PUNCHING SYSTEMS

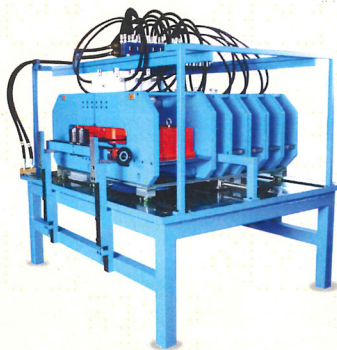

BSP Systems, based in Milan, Italy is one of the **world's leading manufacturers of tube punching machinery**. The company, which was founded in 1963, was the first Italian company producing punching machines for sheet, flat and profiles. From automotive to construction and the food industry to the energy sector, BSP Systems has experience providing tube punching and processing solutions.

BSP Systems has experience in each **solution for sheet metal punching**: from classic "C" frame punching units (equipped with BS tools or standard tool stations A, B, C, D); to complex punching bench, insertable into processing lines from coil. From single workstations, to the **entire punching lines**.

■ Coil punching lines

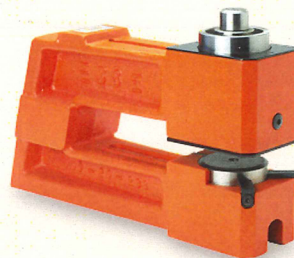

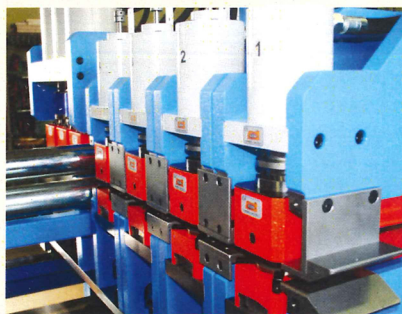

■ Punching benches for coil lines

■ Hydraulic workstations

■ Punching units/molds

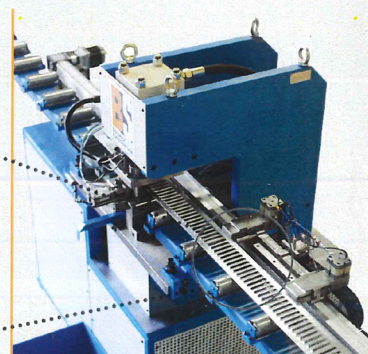

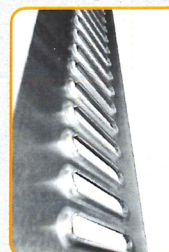

Besides the above mentioned production solutions, BS, thanks to its strong experience and technical department can face and **solve issues concerning the construction of special, hydraulic or electric**, machines in the field of folding, assembling, drilling and punching of sheet metal, profiles and tubulars.

■ CNC bending machine for aluminum bars

■ Metal strips CNC punching machine

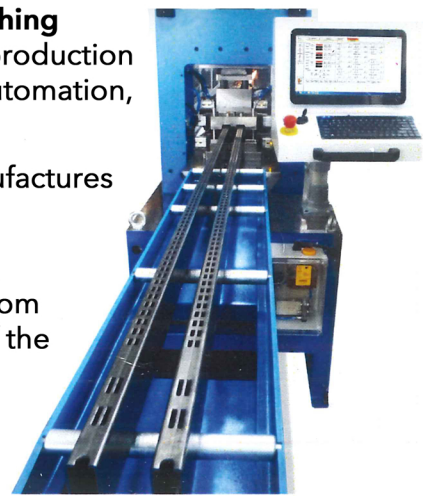

Final result

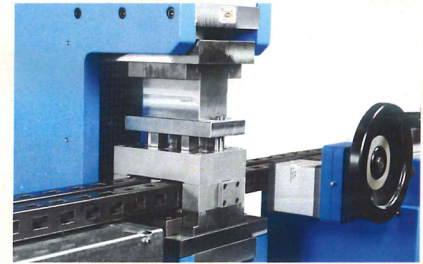

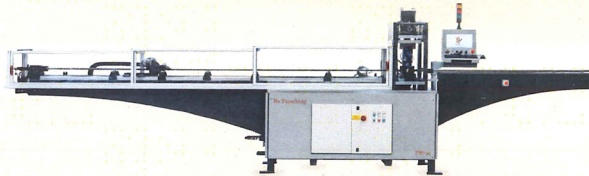

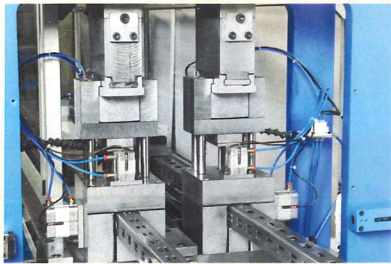

BSP Systems has developed and manufactures a **complete range of punching machines for tubes and profiles**, suitable to satisfy the most challenging production needs. From the increased flexibility of specific production, low to high automation, including loading and unloading pipes.

Including a range of "standard" machines, BSP Systems designs and manufactures specialized machines, built on specific customer needs.

BSP Systems punching machines are distinguished by the great reliability, a result of the technical solutions adopted in the project phase, derived from more than 60 years of experience in punching, as well as for the quality of the components and materials used. Automatic and semi-automatic versions also allow the remote service via Internet connection.

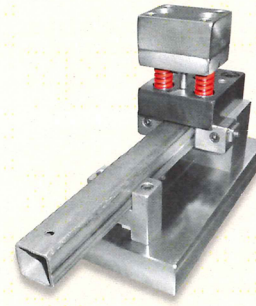

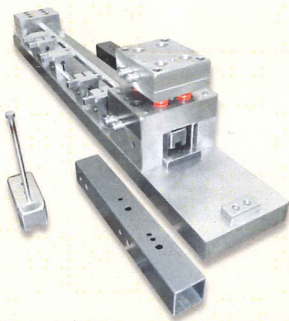

■ CNC Punching machines

■ CNC drilling machines

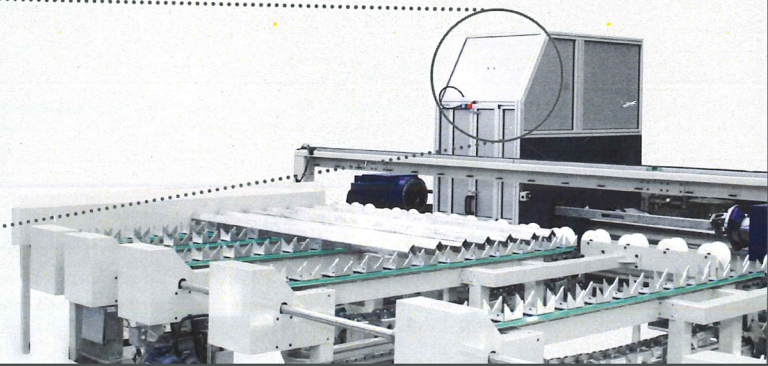

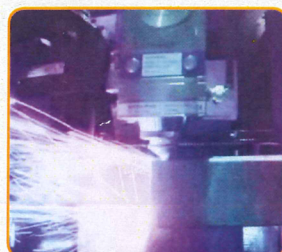

■ Hydraulic units/molds

■ 2D fiber laser tube cutting machine
